

EFFORTLESS VISION EVEN ON THE MOVE

Varilux[®] strives to empower people to feel confident and enjoy life to the fullest, regardless of their age. Each Varilux lens contains many different technologies to deliver great visual performance.

With Varilux[®] progressive lenses, men and women starting to experience the first signs of age related weakening sight can regain their confidence, by enjoying effortless sharp vision at any distance.

With Varilux Physio 3.0, you will experience sharper vision, wider fields of vision and great colour contrast. You will also benefit from smooth transitions between the different viewing zones in the lenses.

You will experience effortless vision, even on the move.

Varilux Physio 3.0 is no different and includes two outstanding innovations.

- 1 W.A.V.E technology, an innovation that considers exactly how light passes through the pupil
- 2 Binocular Booster, a design optimisation that manages the difference in prescription between your right and left eye, reducing the effort made by your brain to merge retinal images

Varilux Physio 3.0 lenses are made using an incredibly accurate digital manufacturing process guaranteeing you a fantastic level of performance from your lenses.

VARILUX[®]
— PROGRESSIVE LENSES —

Today, Varilux[®] lenses are sold in more than 100 countries, giving millions of people the gift of seeing clearly at all distances.

Satisfaction guaranteed

All Varilux lenses are covered by an adaptation guarantee, which means that in the unlikely event you are dissatisfied with your Varilux lenses in the first 60 days, your optician will replace them with a suitable alternative.

For more information ask your optician or visit: www.essilor.co.uk
