VARILUX  clusive™ 4D

Tailormade lens personalised for you

Every eye is different, its shape and the way it moves. We measure both eyes individually, allowing for the most precise vision possible, no matter where you look through the lens.

Through our 3D eye examination we give you an 'eyecode', like a digital finger print of your eyes. Resulting in made-to-measure lenses which are as unique as you are.

Insist on your perfect

What are the benefits of personalised lenses?

- Perfectly suited to your needs, regardless of age, prescription and frame
- Takes into consideration your postural and visual behaviour - only available with Varilux Xclusive 4D
- Faster adaptation to your new varifocal lenses
